

GS-F1900-E

Features

- The motherboard is compatible with 4K (3840*2160), 2K (2560*1440), 1080P (1920*1080) and below;
- Automatically detect the resolution of the input turned on, and use data to speak for clarity;
-
- Clear: exquisite and realistic, convey real colors, show off the true nature;
- Bright: the image quality is improved, just for better presentation;
- Using industrial screen, high brightness, high contrast;
- The use of high-precision standard regulated power supply, specially designed for industrial equipment, supports 24 hours × 365 days of uninterrupted work;
- Support intelligent 3D noise reduction, residual image elimination function, dynamic brightness, contrast color optimization technology;
- Apply the world's leading LCD drive scheme to accurately restore the front-end signal with a strong sense of reality;
- 5 ms extremely fast response, avoiding the tailing phenomenon of the image in high-speed operation.
